INDEX.

*** Those articles that are marked thus † have reference to Mr. Babbage's work on Machines and Manufactures, which in this volume is called the "Appendix."*

A.

Advantages of Machinery and Manufactures, page †1
Advantages of Learning, 2
Agriculture, Population employed in, account of, †2
Ale, method of making it from Mangel Wurtzel, 29
Altered dimensions, copying with—of the Pentagraph—By turning—Rose engine turning—Copying dies—Engine for copying busts—Printing from copper plates—Methods of, described, †22—Machine for producing engravings from medals described, †23—Lace, made by caterpillars, †24
Animals, comparative strength of, 81
Architecture, principles described, 225—orders of, 284—supposed origin of the Corinthian Order of, 168, 225
Arnott, Dr. J. extracts from his works, 92, 100, 115, 200
Atmosphere, description of, 231
Attraction, cause of, explained, 196
Authors, disappointments of, 291

B.

Badnall's plan for ascending hills on Railroads, 245
Balloons, account of, 123
Bees, on the cultivation of, 174—method of preserving, 175
Berrian's, R. plan for propelling steam engines over hills, 105
Bigelow's machine for ruling paper, account of, 209
Black colors, properties of, 333
Blacking, method of making, 324
Boats, constructed of Iron, advantage of, 104
Books, on the abuse of, 287
Boston, List of Societies for promoting Useful Knowledge there, 251
Bottles, method of making described, †18
Brewster, Dr. extracts from, 117
Bridges, account of constructing the Southwark (Eng.) Iron one, 9, 69
Brougham, Henry, Dissertation on the Pleasures and Advantages of Science, 2—Sketch of the public life of, 169
Brown's, Simeon, method of moving brick houses described, 281
Building, mode of constructing a dome without centering, 70
Busts, engine for copying of, described, †22
Buttons, how made, †20

C.

Canals, account of opening the great one at Goetha, 67—account of progress of the Chesapeake and Ohio, 173—list of, in Pennsylvania, 220—accelerated movement on, account of, 292
Canning's Life Raft, description of, 95
Carriages, method of instantaneously disengaging the horses from, described, 22, 54—account of, propelled by steam, 178, 180, 181
Casks, foul ones, method of cleaning, 306
Caterpillars, method of making lace by, described, †24
Cellar Steps, improved, account of, 53
Cements, remarks on their cohesion, by B. Bevan, with tables, 59
——— for Glass or China, 99
Century of Inventions, by the Marquis of Worcester, 83
Character, on the formation of, 117
Chaubert, Mons. his quackery exposed, 242
Checks on Idleness, by means of machinery, 27
Chemical Amusement, 118
Chemistry, History of, 208, 226, 293
Chimney, on drafts of, 12—Smoky ones, cure for, 73
China, method of printing on, described, †15
——— method of embossing, †17
Chiragon, a guide for the blind to write, account of, 156
Cholera, geological course of, 240
Chronometers, trial of, at the Royal Observatory, London, 311
Clay for sculptors, how to preserve, 229
Climate and Passions on the mind, effects of, 331
Clothing, natural and artificial compared, 205
Coal Trade, in America, account of, 20
Coining, method of, described, †19
Column, the largest in the world, 331
Comets, on, 235
Compensating Pendulums, 158
Co-operative Laborers, 328
Copperplate Printing, method of, described, †22
Copying, various methods of, described—by casting in metal, †16—casting in plaster—casting in wax—by moulding—on embossed china, †17—on glass seals—square glass bottles—snuff boxes—knife and umbrella handles—tobacco pipes—embossing on calico and leather—by smith's work—engraving by pressure, †18—gold and silver moulding—ornamental papers, †19
——— by stamping, coins—military ornaments—buttons, †19—French method, †20
Copying by punching, iron plates for boilers—cards for guns—ornaments for gilt paper—steel chains, †20
——— with elongations, wire drawing, †20—tube drawing—iron rolling, †21
——— with altered dimensions, see letter A
Cotton manufactories, account of, in New-York state, 112
Creation, Boundlessness of the, 290
Curves for arches, description of, by Professor Thomson, 217

D.

Decimal Fractions, explained, 325
Diamond, for glass cutting, its hardness, †2
Disbrow and Sullivan's patent for boring rock for water, 229
Diving Apparatus, accounts of, 55, 75, 198
Dry Rot, its causes, &c. by Robert Mudie, 185
Dunham's patent screw-press, account of, 135
Dynanometer, (Milne's,) for railroad carriages, 257

E.

Earthquakes, account of, 113
Economy, advantages of, 255—of time, †2, 332
Eddystone Light-house, description of, 262
Education, universal, 150—simultaneous efforts proposed to promote, 173—proposed plan of, for the poor, 240—importance of, to the Artizan, 285—what is it? 298
Egyptians, mechanical skill of, 333
Elongation, copying with, see letter C.
Embossing on calico and leather, method of, described, †18
England, its manufactures, &c. †1
Engraving in aquatinta, description of, 74—in relief, Asa Spenser's plan, 206—by pressure, †18—on steel, 333
Ericsson's steam engine and water mill, account of, 43—proposed improvement in, 200
Excellence not limited by station, 289
Eye, description of its structure, &c. by Dr. Arnott, 115, 329

F.

Fences, expeditious mode of constructing, 21, 48
Filtering machine, used in manufacturing paper, 11
Fire Alarm, self acting, 120
Fire Carts, Capt. Manby's plan, account of, 139
Fire Engine, (steam one,) accounts of, 36, 76

INDEX.

*** Those articles that are marked thus † have reference to Mr. Babbage's work on Machines and Manufactures, which in this volume is called the "Appendix."*

Copying by punching, iron plates for boilers—cards for guns—ornaments for gilt paper—steel chains, †20
——— with elongations, wire drawing, †20—tube drawing—iron rolling, †21
——— with altered dimensions, see letter A
Cotton manufactories, account of, in New-York state, 112
Creation, Boundlessness of the, 290
Curves for arches, description of, by Professor Thomson, 217

D.

Decimal Fractions, explained, 325
Diamond, for glass cutting, its hardness, †2
Disbrow and Sullivan's patent for boring rock for water, 229
Diving Apparatus, accounts of, 55, 75, 198
Dry Rot, its causes, &c. by Robert Mudie, 185
Dunham's patent screw-press, account of, 135
Dynanometer, (Milne's,) for railroad carriages, 257

E.

Earthquakes, account of, 113
Economy, advantages of, 255—of time, †2, 332
Eddystone Light-house, description of, 262
Education, universal, 150—simultaneous efforts proposed to promote, 173—proposed plan of, for the poor, 240—importance of, to the Artizan, 285—what is it? 298
Egyptians, mechanical skill of, 333
Elongation, copying with, see letter C.
Embossing on calico and leather, method of, described, †18
England, its manufactures, &c. †1
Engraving in aquatinta, description of, 74—in relief, Asa Spenser's plan, 206—by pressure, †18—on steel, 333
Ericsson's steam engine and water mill, account of, 43—proposed improvement in, 200
Excellence not limited by station, 289
Eye, description of its structure, &c. by Dr. Arnott, 115, 329

F.

Fences, expeditious mode of constructing, 21, 48
Filtering machine, used in manufacturing paper, 11
Fire Alarm, self acting, 120
Fire Carts, Capt. Manby's plan, account of, 139
Fire Engine, (steam one,) accounts of, 36, 76

Fire Escape, Mr. Murray's plan, 67
Fire Proof Cement, 291
Fixed Stars, twinkling of, 203
Foot Railroads, advantages of, 27
Force, experiments by, to move a block of stone, †2—too great for human power, 9
Franklin's Moral Code, 263
Friction Clutch-box, for adjusting intermitting machinery, account of, 70
Fulton, Robt. account of his first steamboat voyage, 173
Future, bias of mind respecting the, 328

G.

Garden of Bijous, description of, by Flora Brumal, 191
Geometrical Diagrams, review of, 290
Gilding on leather, imitation of, 334
Gipseys of Granada, a tale, 141
Glass, method of staining, 56
—— etching on, 56
—— manufacture, account of, 334
Glossary of Mechanical Terms, 51, 107
Gordon, Alexander, on steam carriages on common roads, 178
Grease, method of removing from carpets and woollen cloths, 123
Gun, M. J. A. Demondion's newly invented one, 23
Gunter's Scale, account of, 296

H.

Hainsselin's motive power, 269
Hancock's steam carriage, account of, 80
Hats, napped by steam, 334
Heads of brass, earthen-ware, &c. constructed so as to articulate, 117
Heat, on its spreading by conduction, 100
Hoe's improved Napier press, description of, 238
Hoe & Co.'s machine manufactory, account of, 335
Holt's new hotel, and memoir of Holt, 7, 127
Homer's supposed allusion in his Odyssey to steam vessels, 264
Horse Shoe, account of an improved one, 79
Hosack, Dr. plan for an improved stercorary, 273
Hotchkiss' improved grist mill, description of, 98
Hot Air Blast, economy of, 25
Hot Water, account of heating greenhouses by it, 26
Human Power, additions to, †2
Hunter's Screw Press, account of improvements in, 78
Hydraulic Press, Russell's description of, 64, 141

I. & J.

Ink, distributing apparatus for letter press printing described, 239
Insects, vitality of, 198
Instinct, dissertation on, 243
Instruction, Mutual, 253
———— in France, 307
Introductory Notice, 1
Iron, of Borneo, 58
—— trade in Great Britain, account of, 179
—— casting, description of, †16
—— rolling, description of, †21
Jefferson's Ten Rules, 252
Journal of the Franklin Institute, brief analysis of, 157, 213, 277

K.

Kettle Holder, improved, an account of, 77
Knife Handles, method of making, †18
Knowledge, its pleasures and benefits, 167
———— its progress, by Dr. Arnott, 286
———— excess in pursuit of, 304

L.

Lace Bark Tree, description of, 19
Lace, made by caterpillars, description of, †24
Lathe, improved by Walker, description of, 107
Learning, advantages of, 2
Leather, how to render it water proof, 262
Levers, advantages of long ones in locomotive machines, 60
Lithography, applied to book printing, instead of letter press, by means of transfer, and brought out in relief, †11—method of lithographic printing described, 15
Liverpool, description of its docks, &c. 37, 123
Locking Wheels of Carriages, Mason's improvement, 17
Locomotive Engines, a table exhibiting their performances on planes of different inclinations, 31—Baldwin's new invention, 32

M.

Machine for Harrowing, Sowing, &c. account of, 272
Machinery and Manufactures, advantages of, †1
Machine and its Model, remarks on, by E. Sang, 302
Manufacturing, distinction between, and making—Mechanical Arts, outlines for a description of, †25
Marble, method of sawing and polishing by machinery, 309
Materials of small value, their use, &c. †3—Economy of, †12
Mathematical Prodigy, account of, 106
Mechanics' Institution (London), report of Alexander Gordon's lectures there, 178
———— for Improvement of Architecture at New-Haven, account of, 275
Mechanics, respectability of, 167
Mechanical Science, antiquity of, 311
Mechanical Powers, all united in one machine, 325
Mechanics' Magazine, (London,) brief analysis of, 155, 213, 276
Medals, machine for producing engravings from, description of, †23
Men and Animals, strength of, 81
Merchants' Exchange, New-York, description of, 161
Method, importance of, 202
Meteorological Record, kept at New-York, 96, 159, 214, 278, 341
———— Charleston, S. C. 158
———— Avoylle Ferry, Red River, 158, 343
Microscope, Hydro-Oxygen, account of, 235
Mind and Heart, influence and action on each other, 288
Mollery's improvement in Ericsson's Steam Engine, 200
Motions and Forces, equal actions of 92
Motive Power, Hainsselin's, 269
Moulding, bricks and tiles, embossed china, seals, knife and umbrella handles, tobacco pipes, &c. account of, †17
Mountebanks, their quackery exposed, 242
Mutual Instruction, 253

N.

Nail Heads, how made, †24
Nails, how to tin them, 333
Napier Printing Press, Hoe's improvement on, 238

O.

Objects of Machinery, †4
Ogle's Steam Carriage, account of, 277
Oil Cloth, method of printing described, †15
Orr's Economical Store, 56
Organized Structures, composition of, 125
Origins of Men of Genius, 168

P.

Paine, Thos., inventor of Iron Bridges, 10
Paper, Filtering Machine used in manufacturing, account of, 11
Paper Ploughing and Stamping Machine, account of, 49
Paper Ruling Machine, Bigelow's, account of, 209
Parkes' Filters for Rain Water, account of, 230
Pear, Jargonelle, description of an extraordinary one, 118
Peat, economical use of, as fuel, 18
Pennsylvania, improvements in, account of, 200
Pentagraph, description of, †21
Philosophers, self taught ones, 298
Physics, facts in, 289
Pin Making, Machine for, account of, 58
Pipe Making, Tobacco, described, †18
Planing Machine, account of, 46
Plaster, method of casting in, described, †16
Ploughs, wrought iron ones, economy of, 21
Power, various methods of increasing, †5—Regulating of, in Steam Engines in water by air, †6
Precipice, Pendleton District, South Carolina, description of, 116
Price, verification of, its influence, †27
—— durability of its influence, †30
—— as measured by money, †31
Printing, substitute for, 11
———— from cavities, †13—from copper-plate—from steel plates—music from pewter plates—calico from cylinders—from perforated sheets of metal [stencilling], †14
———— from surface, wooden blocks—by moveable type, †14—from stereotype—calico from blocks—on china—lithographic—oil cloth, †15—by register, †16—from copper plates, with altered dimensions, †22
Printing Machines, Applegath's, 144—Smith's Press, 199—In Turkey, 260—Kitchen's, [Newcastle, Eng.] improved one, 301
Pulleys, improved leading blocks of, 66
Pump, self acting one, account of, 66—Rowland's forcing, 120
Punching, see letter C, article Copying
Punctuality, importance of, 202

Q.

Quackery Exposed, 242

R.

Railroads, advantages of, 24—for foot paths, 38, 63, 74, 114—list of, in Pennsylvania, 222—progress of, in England, 181—account of Guard Rail, 189—Scrivenor's improved plan, 193—plan for ascending hills, 245

Railroad Cars, effect of grade and curvature on, 10

Rain, cause of, 56

Rainbow, description of, its cause, &c. 121

Registering Operations, description of, †10

Repertory of Patent Inventions, London, brief analysis of, 156, 276

Review of Working Man's Companion, 248

——— of Library of Useful Knowledge, 336

Rice Paper, description of, 204

Road-Making, Mr. J. S. Williams' plans, 181—M'Adam's plan, 182

Rocks, blasting of, under water, 198

Roofs, fire-proof, 188

Rose Engine Turning, description of, †21

Rowland's Forcing Pump, account of, 120

Rudders, account of Taylor's patent for, 151

Rules for Practical Life, 252

S.

Sabbatton's Patent Ink Distributor, description of, 239

Saccharine Aliment, 47

Salt, scarce in Africa, 301

Salt Water Freshening Apparatus, account of, 268

Saturday Night's Wages, 255

Saul, M. (Lancaster, Eng.) letters from, 26, 118

Sawing, Planing, and Grooving Machine, improvement in, 57

Sawing and Boring Machine described, 308

Science preceding Art, 293

Schools, proposed co-operation of, 224

Screw, new modification of the power of, 113

Scrivenor's improved plan for constructing Iron Railways, 193

Seals of Glass, method of manufacturing described, †18

Self-steering Ship, account of, by Dr. Arnott, 200

Ship Building, Ballingall's improvements, account of, 162

Shipwreck, Mr. Murray's plan for saving from, 28, 39

Silk, important culture of, 41—consumption of, 333

Silk Reel, improvement of, 12

Sisal Hemp, account of, 48

Smith's Printing Press described, 199

Smoky Chimnies, cause of, 73

Snow, nature and formation of, 166

Snuff Boxes, of wood, how made, †18

Social Condition, improvement in, 300

Southwark Iron Bridge, account of its construction, 9, 69

Spontaneous Combustion, 120

Starch, method of preparing it from potatoes, 119

Steamboats, new claimant for the invention in the person of John Smith, St. Helen's—another by W. Symington, Jun. for his deceased father, 143—Torrey's Safety Apparatus, 153—Experiments on Canals, 155—Fulton's account of his first voyage, 173.

Steam Camel, proposals for constructing one, 219

Steam Carriages, remarks on, by A. Gordon, 178—Mr Ogle's performance with, 181, 277—Capabilities of, on common roads, 180—Hancock's, 80, 306—Berrians, 105

Steam Engines, Mr. Baldwin's, on Philadelphia Railroad, 32—Col. Macirone's, 33—for extinguishing Fire, 36—Ericsson's, 42, 236—proposed navigation of the Ocean by, 62—probable application of, 118—proposed improvement on Ericsson's, 200—Milne's Dynanometer, 257

Stocking-Knitter, account of an improved one, 204

Stomach Pump described, 195—Method of dislodging poison without it, 196

Stone Splitting Screws, account of, 265

Stove, economical one, 55

Straight Edges, value of, to workmen, 323

Submarine Boat, account of, 237

Surface, printing from, see letter P, article Printing

T.

Tanning, improved method of, 23

Taylor's Patent Rudders, account of, 151

——— Report of Surveys near Blossburg, 223

Telegraphs, improvement of, by means of electricity, 23—proposals for establishing them in France, serviceable by night as well as by day, 204

Temperance Societies, Statistics of, 202

Thrashing, mode of, in Germany, 119

Thus I Think, from Lord King's edition of Locke's Miscellaneous Works, 259

Tichenor's Window Sash and Pannel Frame Machine, account of 237

Time, economy of, †2—saving of, in natural operations, †8

Tools, descriptive account of the uses of, †3

Torrey's Safety Apparatus for Steamboats, account of, 153

Track Roads of Wood, Mr. Williams' plan, 211

Trees, method of eradicating stumps of, by Bramah's Pump, 55

Tube Drawing, method of, described, †21

Turning, method of, described, †21

Turpentine, its injury to paint, 305

U.

Useful Continued Motion, account of, 133

V.

Velocity, increase and diminution of, †6

Venus' Fly-Trap, a flower, account of, 126

Vermicelli, method of making, described, 21

W.

Wages, method of paying on Saturday, 253

Waggon, improved one for excavating, description of, 66

Walker's improved Lathe, description of, 107

Water, pure, Disbrow and Sullivan's plan for procuring it in New-York, 229—how to freshen salt water, 268

Water Fall, Franklin county, Georgia, description of, 116

Waves, on their formation and altitude, 76

Wax, method of casting in, described, †17

Wells, method of sinking, account of, 292

Wheel Carriages, improvements on, 12, 17, 35, 65—wrought iron suspension ones, 71

Wheel Guards, Zallickoffer's invention, account of, 246

Wheel Work described, 307

Whitney, Eli, Memoir of, 314

Williams', J. S., method of Road Making, 181, 209

Wind-mill, Horizontal, described, 54

Wire Drawing, method of, described, †26

Wonders of Philosophy, 54

Wooden Spoon Manufacturer, account of, 324

Woodside's Harrowing and Ploughing Machine, account of, 272

Wool, method of turning it into Fur 112

Worcester's, Marquis of, Century of Inventions, complete, 83

Work, mode of identifying when of the same kind—accuracy of, when executed by machinery, †13

Working Man's Companion, review of 247

Wrought Iron, Ploughs made of, 21.
